we started off with the 3.1 version. We based it off the PDO viewer and were running into too many bugs so we just downgraded to the 3.0 viewer

Janine will send you a word version of the SOP

thanks

No problem.

Are we running two different versions of the WestFertilizer viewer?

Oh, and I will need a copy of the word document of the SOP that is editable in order to update it to V3.0/3.1.

Brett

Can you start working on this stuff?

Updates for the Viewer – 3.0 West Viewer -
<http://gis.eparesponsemanager.net/r6/WestFertilizer/>

-
- 1. Implement the extent grabber widget on the [current ER Flexviewer](#) (It is version 3.0)
- 2. Move over any of the missing widgets from the 3.1 Viewer
 - a. EPA Facilities Search

- b. Buffer Tool
- c. Add Layer from Web.

Updates for the Viewer – 3.1 West Viewer -

http://gis.eparesponsemanager.net/r6/WestFertilizer_3_1/

1. Implement the fix you did to the Extent grabber widget on this viewer.

PDO Viewer – Current Version

Bugs noticed:

1. Data Layers and Legend widget needs to be checked out – after you check a layer on then turn it off the ability to check another layer on and off goes away. Check out the [WestFertilizer 3.1 viewer](#) for the response specifically on the VIPER

Additional Things to look at.

1. Update SOP for Flexviewer 3.0. we see something's that are different in the config file and the widgets need to be updated.

Also something's we noticed as we advance in versions icons and hover names of tools change. I think this is something for the users we should try to keep consistent.

Call me if you have questions

Thanks
